

ChangeCampAU brings together people and organisations who want to make a difference.

It is an 'unconference', a workshop-style event where sessions in the agenda are created by participants. A catalyst for change and 'do-ocracy,' ChangeCampAU is a new way galvanise people and organisations who want to participate in social innovation.

engage2 created ChangeCampAU for an Australian audience, building upon the original process designed by the ChangeCamp team in Canada with their support.

We're currently building a community of people across the world who are skilled ChangeCamp facilitators to deliver ChangeCamps for communities, organisations and for widespread global challenges.

COMMUNITY CHANGE CAMP

for smart cities and communities who want to encourage active citizenship and social innovation

CHALLENGE CHANGE CAMP

to explore new ways we might address complex social challenges

ORGANISATIONAL CHANGE CAMP

so your employees, executives and shareholders can participate in the future of your business

Low cost, light touch and encouraging, COMMUNITY ChangeCamp is a smarter way to engage with community. The initiative brings together people from government, the NGO sector, the business community and citizens who want to, or who already are, using their skills to deliver social change, and encourages them to self-organise.

Anyone can host a COMMUNITY ChangeCamp – individuals, organisations, government – but we encourage you to work together. After all, that's what it's all about! We help build your confidence and capabilities to facilitate, or we can facilitate for you.

There is some structure to the event: a facilitator encourages participants to contribute topics for discussion; participants share how they are affecting change (or would like to) and find others who can help maximise the social impact of their efforts. The closing 'Ask-and-Give' session encourages action and ongoing collaboration.

Reach out if you want to encourage the people and businesses in your community to work together for social change.

Many of the challenges facing our society today feel insurmountable. Homelessness, climate change, our aging population and the care crisis are monumental problems no single person or organisation can address.

But there are many people doing great work to combat these challenges, and many more who want to help. This is why we created CHALLENGE ChangeCamp.

CHALLENGE ChangeCamp is an open, relaxed, supportive initiative to help people working on the same challenge learn about each other's efforts and explore ways to work together.

You don't have to do it alone or compete for funding and resources. CHALLENGE ChangeCamp will help you find people who care about the same issue so that you can maximise your impact and make real headway on an issue close to your heart.

Get in touch if you want to work with others to maximise the social impact of your initiatives.

ORGANISATIONAL ChangeCamp is a low cost, innovative, highly participatory method to engage employees, executives, shareholders in the future of your business.

Organisational ChangeCampAU is an open forum for the exchange and free-flow of ideas so you can draw on the creative thinking of the key people in your organisation. It's the perfect way to engage key people in the co-design and co-deliver of your organisations innovation, work of the future and social impact initiatives.

Get in touch if you want to inspire your stakeholders to participate in the future of your organisation.

QUOTES

"Together, we will create a constellation of change agents to increase the effectiveness of people and organisations working to deliver social outcomes."

"It's like a waterhole, where proactive people who care about making a contribution, gather. These are people who aren't motivated by personal security, people skilled at and confident in handling change."

"A wonderful day of meeting new people and hearing new perspectives."

"Inspiring, energising, motivating, valuable, fun."

"Amazing opportunity to meet like-minded people and maximise change!"
